Notice of shipment of medical ventilator for export to the Republic of Cuba.

We would like to express our sincere gratitude for your continued support and patronage.

We have delivered 25 units of the brand-name "miniVent-3" general-purpose respirator to the embassy of Cuba in Japan. The long-selling model "miniVent-3", which boasts outstanding usability, has a compact body size and can be used with general purpose breathing circuits from various companies.

In addition, we have made improvements to comply with the electrical safety test standard IEC 060601-1 and comply with the test requirements.

We pray that the coronavirus will end and our daily lives will return as soon as possible by contributing to the tight medical system.

miniVent-3 (electrical safety test standard IEC 060601-1)
